9/11 C&B

1- Legislative tob. Kennedy - bill reported out - not going anywhere this session (in the senate).

comm. human labor resources - drug addictions - public as company needs

what disclosure is required by law?

grandfathering / model - CPTS - starting point - but there are conceptual differences between food & cigarettes - routes of exposure are different -

2- Waxman 7/19 hearing

Whittaker made a statement (enclosed)

↳ does not distinguish between constituents in smoke + additives.

* markup is on for 9/11/90 10:30AM

- aggregate of almost all anti-smoking facets in original bill - e.g. advertising changes were introduced -

Waxman / Bliley - worked out some compromise - though Whittaker (who is not running for reelection) and is very anti-tob - would like to see bill moved forward -

Dave Rheems (C&B contact on markup)

Tombstone advertising 'will' (?) be deleted -

~~Inquest~~

- addiction warning added
- smoking causes ~~stroke~~
- warnings highlighted - borders background etc etc.

Inquest.

Whittaker disclosure provisions - initially only are cautious
- complete list and # in each products - each brand formulae → HHS → Congress → could go anywhere
- Secy makes a report - alone or cancel as intended - 3yr and then annually - HHS - risk to health - if you didn't take it out of would be put on the label - No Review Periods

Bliley / Tauke very confusing scenario with an uncertain outcome

- could be no legislation
- if voted out of sub committee - Dingell - involved
